Look for evidence of leaks in the hot water tank, or mechanical damage, or improper installation. For example most water heaters are intended to be installed in a vertical position. Installing a hot water tank horizontally or in a hole in a crawl space is likely to cause early failure of the heater, violate the manufacturer's guidelines, and may be dangerous. In our photo at left that puddle ...

The Aero A.32 was a biplane built in Czechoslovakia in the late 1920s for army co-operation duties including reconnaissance and tactical bombing. While the design took the Aero A.11 as its starting point (and was originally designated A.11J), the aircraft incorporated significant changes to make it suited for its new low-level role. Like the A.11 before it, the A.32 provided Aero with an ...
