In their contributions all authors emphasize the imperative to find a balance between nature and people being creative and critical as a key factor in building sustainable landscapes through collaborative and adaptive design. Designing Greenways belongs to a series books with mentors such as Design with Nature (McHarg 1969), The Granite Garden: Urban Nature And Human Design, (A. W. Spirn 1985), and more recent books such as Green Infrastructure: Linking Landscapes and Communities ...

In Designing Greenways, the field of landscape ecology provides the framework for greenways and greenway design. Richard Forman's work and other cutting edge work is frequently cited as a landscape ecology primer. Metapopulations, patchiness, connectivity, and issues of scale are considered in detail. This material is introduced in a straightforward manner so that one unfamiliar with these topics will not be at a disadvantage. Definitions and explanations of terms are given throughout the book.
