Ethnology is the comparative study of cultures with the aim of presenting analytical generalizations about human culture. Anthropologists do not rely on data from just one study to make interpretive statements about human conditions (Lenkeit: 16). Ethnology also uses forms of quantification, to help make their data easily comparable, and recordable. Ethnography employs two methods of research ...

Introduction to Genetics. Genetics is the study of how genes bring about characteristics, or traits, in living things and how those characteristics are inherited. Genes are specific sequences of nucleotides that code for particular proteins. Through the processes of meiosis and sexual reproduction, genes are transmitted from one generation to the next. Augustinian monk Gregor Mendel developed ...
