From the Castro bathhouses to AZT and the denial of AIDS in South Africa, this sweeping look at AIDS covers the epidemic from all angles and across the world. Engel seamlessly weaves together science, politics, and culture, writing with an even hand—noting the excesses of the more radical edges of the ACT UP movement as well as the conservative religious leaders who thought AIDS victims ...

A comprehensive survey of the AIDS epidemic from its first detection in the 80s to the present. Engel hits on the science and politics of AIDS, focusing on how various groups manipulated the crisis for their own ideological goals. There's also a bit on the controversies within the scientific community over discovery and the eccentric denialism of molecular biologist Peter Duesberg.

AIDS is caused by a human immunodeficiency virus, which originated in non-human primates in Central and West Africa. While various sub-groups of the virus acquired human infectivity at different times, the global pandemic had its origins in the emergence of one specific strain – HIV-1 subgroup M – in Léopoldville in the Belgian Congo in the 1920s. There are two types of HIV: HIV-1 and HIV-2. HIV-1 is more virulent, easily transmitted and is the cause of the vast majority of HIV ...
